January 15, 1985

Harry E. Fitzwater, DDA
Central Intelligence Agency
Washington, D.C. 20505

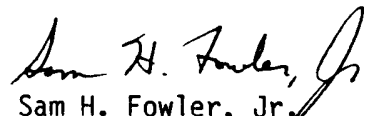

Dear Harry:

STAT I recently inquired of [] in procurement whether he knew of anyone at the Agency who currently needed the services of a small, independent electronics engineering company. He mentioned your name and encouraged me to forward the enclosure to you on the chance you might be aware of such a need in areas unknown to him.

Most of SETA's work has been for the Navy through REWSON (PDE107), which has utilized our services in the acquisition of several signal collection and analysis systems. Although we generally function as problem solvers working to develop system solutions for signal problems, we have also developed over the years some apparently novel ideas for signal detection receivers, and would welcome an opportunity to explore their merits with interested parties.

Let me thank you in advance for your time spent with this letter and for any action you may take on behalf of SETA. If you find you need any further information regarding SETA, its interests, experience, or capabilities, I would be pleased to provide it.

Very truly yours,

Sam H. Fowler, Jr.
President
